

(1) Download zip

(2) Unzip

(3) Run setup.exe

You may be prompted to click “allow”

(4) Go to region & language settings, or some similarly named menu

## Region & language

### Country or region

Windows and apps might use your country or region to give you local content

United States

▼

### Languages

#### Windows display language

Windows features like Settings and File Explorer will appear in this language.

English (United States)

▼

#### Preferred languages

Apps and websites will appear in the first language in the list that they support.

(5) Click on “English” under the languages submenu and click “options”

(6) Click add keyboard and select “mathkeys”

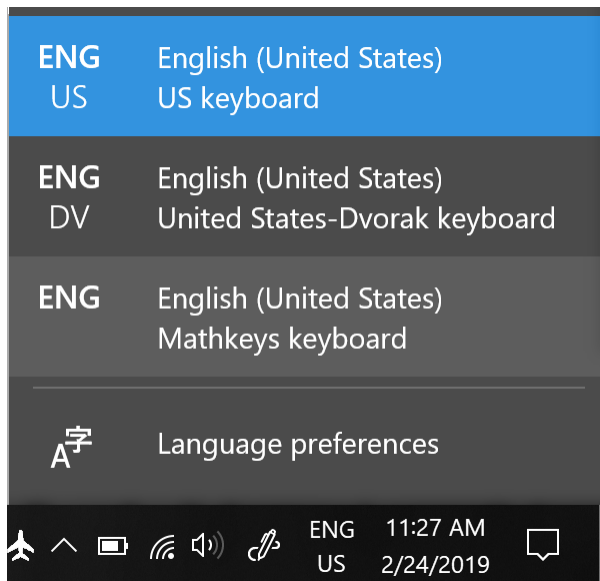

## Keyboards

You may see the following ENG/US icon appear

**(7) Clicking on it should give you a list of your keyboards**

**(8) Select mathkeys and you're good to go!**

You might need to restart your computer for mathkeys to appear.

If the icon disappears after you restart your computer, re-navigate to your keyboard settings and it should reappear

If that doesn't work, go to advanced keyboard settings under region and language settings

## Advanced keyboard settings

\*Some settings are hidden or managed by your organization.

### Override for default input method

If you want to use an input method that's different than the first one in your language list, choose it here

Use language list (recommended) 

### Switching input methods

☒ Let me use a different input method for each app window

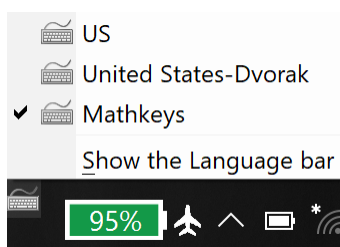

☒ Use the desktop language bar when it's available

#### Language bar options

And turn the language bar on. You can select “Language bar options” to configure its appearance. This will cause this keyboard icon to appear on your taskbar, or this bar to appear on the top of your desktop

And you can select mathkeys

And you're good to go!
